

TIFFEN® Digital HT

A Major Breakthrough In Multi-Coated Filter Technology

Made from the purest optical quality glass with Tiffen's award-winning ColorCore™ technology, Tiffen Digital HT™ - High Transmission - filters offer a new breakthrough in multi-coating technology. Imagine, a double-sided coated filter with the strength of titanium, unmatched scratch-resistant durability and worry-free cleaning. Other coated filters on the market today cautiously suggest delicate, if any, cleaning procedures, in fear of destroying the coating (and thereby the filter). Not with the Digital HT™ filters - the secret is in the titanium coating that makes Digital HT™ extremely durable and protects against damage and mark up.

And that's not all – these High Transmission filters feature a low profile ring with anti-reflective black lock ring, and distinctive titanium finish that sets them apart from the rest. Digital HT™ filters are made in the USA and come with a 10-year warranty – your guarantee of quality assurance.

Test results conducted by The Rochester Institute of Technology (RIT) and an independent testing lab.

All Tiffen filters are backed by a 10-year warranty and are made in the USA.

- Superior Transmission
- Easy-to-Clean Surface
- Scratch Resistant
- Anti-Reflective Ring
- Water-White Glass
- Distinctive Titanium Finish
- Low-Profile Filter Ring
