Introducing . . .
THE TIFFEN
VARIABLE ND FILTER
Available May 1st

Features:

- * Provides 2 to 8 stops of light control
- * Thin profile ring—9mm
- * Wider outer optic to help reduce vignetting at wide angles
- * Comes in Tiffen Professional packaging with padded black nylon pouch
- * Made in the US with high quality optical glass using Tiffen's ColorCore™ Technology
- * 10-Year Warranty

The Tiffen Variable ND Filter is a versatile and flexible tool, affording you the convenience of using several Neutral Density filters all in one. Primarily used as a photographic tool for controlling depth of field and exposure, the Variable ND is being sought in the video market as well because it is fast, easy to use, small and light-weight, and does not require additional accessories such as a matte box. Currently available in 77mm only. Additional sizes for both still and video coming soon.
